For Newly Qualified Chartered Accountants

PILOT BATCH FEE

Regular fee

~~₹50,000 + GST~~

₹35,000 + GST

From Qualification to Practice Readiness

Thirty days, residential, full time; a flagship practice-readiness programme that turns technical qualification into practical, client-ready capability.

30 CPE Hours

VENUE

ICAI Centres of Excellence – Jaipur & Hyderabad

Qualification Is the Beginning. Practice Is the Real Examination.

Clearing the CA examination proves you can master a body of knowledge under pressure. Professional practice asks a different question: can you build something — a client's trust, a service that solves a real problem, a firm that stands on its own? The 30-Day Residential Training Programme is ICAI's response to that gap — a flagship practice-readiness programme that turns technical qualification into practical, client-ready capability.

You have qualified as a Chartered Accountant. This programme is where you prepare to practise as one.

WHY THIS PROGRAMME?

Qualification gives you the foundation. Practice demands the application.

Practice today is being reshaped by evolving client expectations, technology-led and AI-enabled workflows, rising competition alongside genuine advisory opportunity, and a widening menu of practice areas; from statutory audit and tax to GST litigation, MSME advisory and virtual CFO services. None of this is simulated in the examination hall. The programme is built on one idea: that these capabilities can be taught, practised and internalised before a young CA takes the first, most consequential steps of an independent career.

Six Realities of Contemporary Practice

- 01  Clients who expect **advisory insight**
- 02  **Technology** and AI-led workflows
- 03  A widening **opportunity** landscape
- 04  Communication, negotiation and **trust**
- 05  **Practice systems**, quality and documentation as daily discipline
- 06  Professional **ethics and risk management** as the foundation

What Makes This Programme Different?

30-Day Immersive Residential Experience

Continuous, full-time immersion — long enough to build real capability and real peer relationships.

Hands-On Domain Labs

Dedicated labs in GST, Income Tax, MSME advisory, Consulting and Corporate Audit — live filings, not just theory.

Business Development Built In

Negotiation, pricing, personal branding and client acquisition taught as core practice skills.

A Personal Practice Roadmap

The programme closes with each participant presenting their own identity, niche, offerings and 90-day launch plan.

Practice-Oriented, Not Just Technical

Built around the actual decisions of running a practice — pricing, client acquisition, infrastructure, systems.

A Genuine Technology & AI Track

Multiple days on practice management software, cybersecurity, the DPDP Act, and applied AI for audit, tax and advisory.

A Firm Visit and Peer Learning

Participants visit practising firms of their choice and present their learnings to the cohort.

FORMAT

Knowledge-sharing sessions, hands-on labs, workshops, case studies, a firm visit and a final roadmap presentation.

DURATION

30 Days, Residential

BATCH

First / Pilot Batch

PILOT BATCH FEE

₹35,000 + GST

CPE HOURS

30 Structured

The 30-Day Learning Journey

Not a timetable to read line by line, but a deliberate progression — from examining the profession to designing a working practice of your own.

Days
1–4

Mindset & Foundation

The inner shift from employee to owner, a values framework for practice, and the practical architecture of a firm — infrastructure, financial planning, practice models, and structured problem-solving.

Day
5

The Opportunity Landscape

Traditional practice areas in depth — audit, tax, GST, accounting, company law — alongside new-age opportunities in AI advisory, ESG, forensic accounting, valuation, virtual CFO services and more.

Days
6–9

Professional & Business Skills

Communication, negotiation, conflict management, pricing, leadership and team building, networking — plus a firm visit and personal branding for a credible digital presence.

Days
10–14

Technology, Quality & Client Systems

Practice management software, cybersecurity and the DPDP Act, applied AI and machine learning, client onboarding, documentation discipline, and productising your service offerings.

Days
15–21

Domain Practice Labs

Hands-on immersion in GST, Income Tax, MSME advisory, Consulting and Corporate Audit — live filings, working papers and case simulations.

Days
22–26

Representation, Governance & Your Roadmap

Representation before CIT(A), ITAT, NCLT, RBI and SEBI; the ICAI Code of Ethics, NFRA and quality frameworks; professional wellbeing; and the Grand Finale — your own presented practice roadmap.

By the End of 30 Days, You Will Be Better Prepared To...

- Define your professional direction and structure a practice around it
- Identify traditional and emerging service opportunities suited to you
- Represent a client with confidence before regulatory authorities
- Engage clients more effectively — from discovery call to fee negotiation
- Use technology and AI responsibly in everyday practice
- Present a structured 90-day launch plan and a longer-term vision

Who Should Attend?

- 01 Newly qualified CAs who aspire to enter professional practice, immediately or soon
- 02 Those considering starting their own practice and wanting to understand what it involves
- 03 Those seeking exposure to both traditional and contemporary practice opportunities
- 04 Those who want to build a technology- and AI-ready practice from the outset

ELIGIBILITY
